

Effective Clinical Practice, Volume 4

A

- Academic medical centers
 - Caregiver perceptions of the reasons for delayed hospital discharge, 250
- Age distribution
 - Misleading presentation of breast cancer in popular magazines, 58
- Age factors
 - Geographic variation in health care, 232
 - Operative mortality with elective surgery in older adults, 172
- Aged
 - Reducing emergency visits in older adults with chronic illness: a randomized controlled trial of group visits, 49
- Ambulatory care
 - Number fifteen, 80
- Angioplasty, balloon
 - Balancing the benefits of primary angioplasty against the benefits of thrombolytic therapy for acute myocardial infarction: the importance of timing, 214
 - Cardiologists performing peripheral angioplasties: impact on utilization, 191
 - Increases in peripheral interventional procedures by cardiologists— are patients or providers being served? 221
 - Treatment delay in myocardial infarction: a timely topic, 226
- Antibiotics
 - Impact of reducing antibiotic prescribing for acute bronchitis on patient satisfaction, 105
 - Prescribing antibiotics: seeing the whole picture, 237
 - Reducing “unnecessary” antibiotic use in primary care; hard rules, soft calls, 136
- Antidepressants
 - Effectiveness of an intervention to improve primary care provider recognition of depression, 163
- Aorta, abdominal
 - Intensive care unit nurse staffing and the risk for complications after abdominal aortic surgery, 199
- Arterial occlusive diseases
 - Cardiologists performing peripheral angioplasties: impact on utilization, 191
- Arterial occlusive diseases
 - Increases in peripheral interventional procedures by cardiologists— are patients or providers being served? 221
- Attention deficit and disruptive behavior disorders
 - Web-based assistance for physicians caring for children with ADHD, 127

B

- Behavior change
 - The case for persuasive health messages/The case for letting information speak for itself, 73
- Behavior symptoms
 - Web-based assistance for physicians caring for children with ADHD, 127
- Benchmarking
 - Physician explanations for failing to comply with “best practices”, 207
- Best practice analysis
 - Physician explanations for failing to comply with “best practices”, 207
- Blood glucose
 - Does measuring fructosamine help patients with diabetes? 189
 - Randomized trial of fructosamine home monitoring in patients with diabetes, 16

- Breast neoplasms
 - Geographic variation in health care, 232
 - Misleading presentation of breast cancer in popular magazines, 58
- Bronchitis
 - Impact of reducing antibiotic prescribing for acute bronchitis on patient satisfaction, 105

C

- Cardiology
 - Cardiologists performing peripheral angioplasties: impact on utilization, 191
 - Increases in peripheral interventional procedures by cardiologists— are patients or providers being served? 221
- Caregivers
 - Caregiver perceptions of the reasons for delayed hospital discharge, 250
- Chronic disease
 - Effect of a self-management program on patients with chronic disease, 256
 - Reducing emergency visits in older adults with chronic illness: a randomized controlled trial of group visits, 49
- Colonoscopy
 - Colorectal cancer screening in Massachusetts: measuring compliance with current guidelines, 10
 - Colorectal cancer screening: keeping the options open, 39
- Colorectal neoplasms
 - Colorectal cancer screening in Massachusetts: measuring compliance with current guidelines, 10
 - Colorectal cancer screening: keeping the options open, 39
 - Diet for fecal occult blood test screening: help or harm? 180
 - Meta-analysis of dietary restriction during fecal occult blood testing, 150
- Communication
 - Sensationalism in the media: when scientists and journalists may be complicit collaborators, 185
- Community health services
 - Promoting a “community wellness” program, 234
- Confidence intervals
 - 95% confidence intervals, 229
 - Statistical significance and *P* values, 183
- Coronary disease
 - How effective is the computer-based clinical practice guideline? 24
- Correlation coefficient
 - Correlation coefficients, 139
- Cost control
 - A practice-based approach to converting from proton pump inhibitors to less costly therapy, 263
- Cost-benefit analysis
 - Assessing hospital quality: a review for clinicians, 82
 - Finding undiagnosed type 2 diabetes: is it worth the effort? 281
 - Screening for diabetes mellitus in high-risk patients: cost, yield, and acceptability, 271

D

- Decision making
 - Decision support and the appropriate use of fibrinolysis in myocardial infarction, 1
 - Deferred care for adults with musculoskeletal complaints, 65
 - Operative mortality with elective surgery in older adults, 172
- Decision support systems, clinical
 - Computer-based decision support: wishing on a star? 34
 - Decision support and the appropriate use of fibrinolysis in myocardial infarction, 1

- How effective is the computer-based clinical practice guideline? 24
- Delivery of health care
 - Geographic variation in health care, 232
 - Reducing emergency visits in older adults with chronic illness: a randomized controlled trial of group visits, 49
 - Variation in clinical preventive services, 121
- Depression
 - A CQI intervention to change the care of depression: a controlled study, 239
 - Effectiveness of an intervention to improve primary care provider recognition of depression, 163
 - Quality improvement can't be optional, 278
- Diabetes mellitus
 - Does measuring fructosamine help patients with diabetes? 189
 - Finding undiagnosed type 2 diabetes: is it worth the effort? 281
 - How effective is the computer-based clinical practice guideline? 24
 - Randomized trial of fructosamine home monitoring in patients with diabetes, 16
 - Screening for diabetes mellitus in high-risk patients: cost, yield, and acceptability, 271
- Dietary restrictions
 - Diet for fecal occult blood test screening: help or harm? 180
 - Meta-analysis of dietary restriction during fecal occult blood testing, 150
- Disease management
 - Does measuring fructosamine help patients with diabetes? 189
- Drug resistance, microbial
 - Impact of reducing antibiotic prescribing for acute bronchitis on patient satisfaction, 105
 - Prescribing antibiotics: seeing the whole picture, 237
 - Reducing "unnecessary" antibiotic use in primary care: hard rules, soft calls, 136

E

- Emergency medicine
 - Number fifteen, 80
- Emergency service, hospital
 - Deferred care for adults with musculoskeletal complaints, 65
 - Reducing emergency visits in older adults with chronic illness: a randomized controlled trial of group visits, 49
- Errors, type I
 - Type I and type II errors, 284
- Errors, type II
 - Type I and type II errors, 284
- Evidence-based medicine
 - Can evidence change the rate of back surgery? A randomized trial of community-based education, 95
 - Physician explanations for failing to comply with "best practices", 207

F

- False-negative reactions
 - Type I and type II errors, 284
- False-positive reactions
 - Type I and type II errors, 284
- Fibrinolysis
 - Decision support and the appropriate use of fibrinolysis in myocardial infarction, 1
- Fructosamine
 - Does measuring fructosamine help patients with diabetes? 189
 - Randomized trial of fructosamine home monitoring in patients with diabetes, 16

G

- Group randomization
 - Group randomized trials, 42
- Health behavior
 - Effect of a self-management program on patients with chronic disease, 256

- Health education
 - The case for persuasive health messages/The case for letting information speak for itself, 73
 - Number fifteen, 80

H

- Health care personnel power
 - Intensive care unit nurse staffing and the risk for complications after abdominal aortic surgery, 199
 - More nurses, better patient outcomes: why isn't it obvious? 223
 - Neonatal workforce: how much is enough? 178
 - The uneven landscape of newborn intensive care services: variation in the neonatology workforce, 143
- Health promotion
 - The case for persuasive health messages/The case for letting information speak for itself, 73
 - Promoting a "community wellness" program, 234
- Health resources
 - Neonatal workforce: how much is enough? 178
 - Reducing emergency visits in older adults with chronic illness: a randomized controlled trial of group visits, 49
 - The uneven landscape of newborn intensive care services: variation in the neonatology workforce, 143
- Health services accessibility
 - Geographic variation in health care, 232
- Health services research
 - Group randomized trials, 42
 - 95% confidence intervals, 229
 - Variation in clinical preventive services, 121
- Health status
 - Effect of a self-management program on patients with chronic disease, 256
- Histamine H₂ antagonists
 - A practice-based approach to converting from proton pump inhibitors to less costly therapy, 263
- Hospitals
 - Assessing hospital quality: a review for clinicians, 82
- Hypothesis testing
 - Statistical significance and *P* values, 183
 - Impact of reducing antibiotic prescribing for acute bronchitis on patient satisfaction, 105

I

- Impulse disorders
 - Web-based assistance for physicians caring for children with ADHD, 127
- Infant, low birthweight
 - Neonatal workforce: how much is enough? 178
 - The uneven landscape of newborn intensive care services: variation in the neonatology workforce, 143
- Intensive care units
 - Intensive care unit nurse staffing and the risk for complications after abdominal aortic surgery, 199
 - More nurses, better patient outcomes: why isn't it obvious? 223
 - The uneven landscape of newborn intensive care services: variation in the neonatology workforce, 143
- Internet
 - Web-based assistance for physicians caring for children with ADHD, 127
- Intraoperative complications
 - Operative mortality with elective surgery in older adults, 172

J

- Journalism
 - Sensationalism in the media: when scientists and journalists may be complicit collaborators, 185

K

- Knowledge, attitudes, practice
 - Educating men about prostate cancer screening. A randomized trial of a mailed pamphlet, 112

L

- Length of stay
 - Caregiver perceptions of the reasons for delayed hospital discharge, 250
- Low back pain
 - Can evidence change the rate of back surgery? A randomized trial of community-based education, 95

M

- Magazines
 - Geographic variation in health care, 232
 - Misleading presentation of breast cancer in popular magazines, 58
- Mammography
 - Geographic variation in health care, 232
- Marketing
 - Promoting a “community wellness” program, 234
- Mass media
 - Geographic variation in health care, 232
 - Sensationalism in the media: when scientists and journalists may be complicit collaborators, 185
- Mass screening
 - Diet for fecal occult blood test screening: help or harm? 180
 - Effectiveness of an intervention to improve primary care provider recognition of depression, 163
 - Finding undiagnosed type 2 diabetes: is it worth the effort? 281
 - Screening for diabetes mellitus in high-risk patients: cost, yield, and acceptability, 271
- Medical errors
 - On errors, 141
- Medical records systems, computerized
 - Computer-based decision support: wishing on a star? 34
 - How effective is the computer-based clinical practice guideline? 24
- MEDLINE
 - Taking advantage of the explosion of systematic reviews: an efficient MEDLINE search strategy, 157
- Mental health services
 - Effectiveness of an intervention to improve primary care provider recognition of depression, 163
- Mortality
 - Operative mortality with elective surgery in older adults, 172
- Musculoskeletal diseases
 - Deferred care for adults with musculoskeletal complaints, 65
- Myocardial infarction
 - Balancing the benefits of primary angioplasty against the benefits of thrombolytic therapy for acute myocardial infarction: the importance of timing, 214
 - Decision support and the appropriate use of fibrinolysis in myocardial infarction, 1
 - Treatment delay in myocardial infarction: a timely topic, 226

N

- Neonatology
 - Neonatal workforce: how much is enough? 178
 - The uneven landscape of newborn intensive care services: variation in the neonatology workforce, 143
- Nurses
 - More nurses, better patient outcomes: why isn't it obvious? 223

O

- Occult blood
 - Colorectal cancer screening in Massachusetts: measuring compliance with current guidelines, 10
 - Colorectal cancer screening: keeping the options open, 39

- Diet for fecal occult blood test screening: help or harm? 180
- Meta-analysis of dietary restriction during fecal occult blood testing, 150

Orthopedics

- Can evidence change the rate of back surgery? A randomized trial of community-based education, 95

Outcome and process assessment (health care)

- Are we overvaluing performance measures? 91
- Assessing hospital quality: a review for clinicians, 82
- A CQI intervention to change the care of depression: a controlled study, 239
- Balancing the benefits of primary angioplasty against the benefits of thrombolytic therapy for acute myocardial infarction: the importance of timing, 214
- Computer-based decision support: wishing on a star? 34
- More nurses, better patient outcomes: why isn't it obvious? 223
- On errors, 141
- Quality improvement can't be optional, 278
- Treatment delay in myocardial infarction: a timely topic, 226

P

Pamphlets

- Educating men about prostate cancer screening. A randomized trial of a mailed pamphlet, 112

Patient acceptance of health care

- The case for persuasive health messages/The case for letting information speak for itself, 73

Patient compliance

- Diet for fecal occult blood test screening: help or harm? 180
- Meta-analysis of dietary restriction during fecal occult blood testing, 150

Patient discharge

- Caregiver perceptions of the reasons for delayed hospital discharge, 250

Patient education

- Educating men about prostate cancer screening. A randomized trial of a mailed pamphlet, 112
- Impact of reducing antibiotic prescribing for acute bronchitis on patient satisfaction, 105
- Reducing “unnecessary” antibiotic use in primary care: hard rules, soft calls, 136

Patient participation

- Effect of a self-management program on patients with chronic disease, 256
- Promoting a “community wellness” program, 234
- Promoting self-referral for advanced imaging, 93

Patient satisfaction

- Impact of reducing antibiotic prescribing for acute bronchitis on patient satisfaction, 105
- Reducing “unnecessary” antibiotic use in primary care: hard rules, soft calls, 136

Pediatrics

- Neonatal workforce: how much is enough? 178

Perceptions

- Caregiver perceptions of the reasons for delayed hospital discharge, 250

Perioperative nursing

- Intensive care unit nurse staffing and the risk for complications after abdominal aortic surgery, 199

Peripheral vascular diseases

- Cardiologists performing peripheral angioplasties: impact on utilization, 191
- Increases in peripheral interventional procedures by cardiologists— are patients or providers being served? 221

Physician practice patterns

- Geographic variation in health care, 232
- Physician explanations for failing to comply with “best practices”, 207

- A practice-based approach to converting from proton pump inhibitors to less costly therapy, 263
- Prescribing antibiotics: seeing the whole picture, 237
- Reducing “unnecessary” antibiotic use in primary care: hard rules, soft calls, 136
- Postoperative complications
 - Intensive care unit nurse staffing and the risk for complications after abdominal aortic surgery, 199
- Practice guidelines
 - Can evidence change the rate of back surgery? A randomized trial of community-based education, 95
 - Colorectal cancer screening in Massachusetts: measuring compliance with current guidelines, 10
 - Computer-based decision support: wishing on a star? 34
 - Deferred care for adults with musculoskeletal complaints, 65
 - How effective is the computer-based clinical practice guideline? 24
 - Physician explanations for failing to comply with “best practices”, 207
 - Variation in clinical preventive services, 121
- Prevalence
 - Geographic variation in health care, 232
- Preventive health services
 - Variation in clinical preventive services, 121
- Primary health care
 - A CQI intervention to change the care of depression: a controlled study, 239
 - Effectiveness of an intervention to improve primary care provider recognition of depression, 163
 - Quality improvement can't be optional, 278
 - Variation in clinical preventive services, 121
- Probability
 - 95% confidence intervals, 229
- Process assessment (health care)
 - Cardiologists performing peripheral angioplasties: impact on utilization, 191
 - Increases in peripheral interventional procedures by cardiologists—are patients or providers being served? 221
- Prostate-specific antigen
 - Educating men about prostate cancer screening. A randomized trial of a mailed pamphlet, 112
- Prostatic neoplasms
 - Educating men about prostate cancer screening. A randomized trial of a mailed pamphlet, 112
- Proton pump inhibitors
 - A practice-based approach to converting from proton pump inhibitors to less costly therapy, 263

Q

- Quality of health care
 - Are we overvaluing performance measures? 91
 - Assessing hospital quality: a review for clinicians, 82

R

- Random allocation
 - Group randomized trials, 42
- Report cards
 - Assessing hospital quality: a review for clinicians, 82

- Review, systematic
 - Taking advantage of the explosion of systematic reviews: an efficient MEDLINE search strategy, 157
- Risk factors
 - Finding undiagnosed type 2 diabetes: is it worth the effort? 281
 - Screening for diabetes mellitus in high-risk patients: cost, yield, and acceptability, 271
- Risk
 - Misleading presentation of breast cancer in popular magazines, 58

S

- Science
 - Sensationalism in the media: when scientists and journalists may be complicit collaborators, 185
- Search strategy
 - Taking advantage of the explosion of systematic reviews: an efficient MEDLINE search strategy, 157
- Self-management
 - Effect of a self-management program on patients with chronic disease, 256
- Self-referral
 - Promoting self-referral for advanced imaging, 93
- Sensationalism
 - Sensationalism in the media: when scientists and journalists may be complicit collaborators, 185
- Sigmoidoscopy
 - Colorectal cancer screening in Massachusetts: measuring compliance with current guidelines, 10
 - Colorectal cancer screening: keeping the options open, 39
- Smoking
 - The case for persuasive health messages/The case for letting information speak for itself, 73
- Statistics
 - Correlation coefficients, 139
 - 95% confidence intervals, 229
 - Statistical significance and *P* values, 183
 - Type I and type II errors, 284
- Surgical procedures
 - Can evidence change the rate of back surgery? A randomized trial of community-based education, 95
 - Operative mortality with elective surgery in older adults, 172

T

- Thrombolytic therapy
 - Balancing the benefits of primary angioplasty against the benefits of thrombolytic therapy for acute myocardial infarction: the importance of timing, 214
 - Treatment delay in myocardial infarction: a timely topic, 226
- Time factors
 - Balancing the benefits of primary angioplasty against the benefits of thrombolytic therapy for acute myocardial infarction: the importance of timing, 214
 - Treatment delay in myocardial infarction: a timely topic, 226

V

- Variation, geographic
 - Geographic variation in health care, 232
